GreenVista<sup>®</sup>, AirGuard<sup>®</sup> and GroundGrid<sup>®</sup>

POLYPROPYLENE NON WOWENS

At DuPont, Product Stewardship is an important aspect of our supply chain relationships. We maintain an unwavering commitment to safety for our employees, our contractors, and the communities in which we operate and we share that concern for all who handle our products. As both a manufacturer and importer/exporter of substances<sup>1</sup> covered under REACH, DuPont has established a team to address all of the requirements as they apply to our suppliers, our customers, and our own operations.

The purpose of this communication is to inform you of our current plans:

- DuPont is ensuring that all products sold to our EU and EEA customers by DuPont legal entities in Europe<sup>2</sup> are in compliance with REACH regulatory requirements, including pre-registration<sup>3</sup>.
- DuPont does not intend to communicate REACH pre-registration numbers based on guidance in CEFIC REACH Industry Preparation Letter No 9.

REACH requires registration for individual substances (on their own or in preparations<sup>4</sup>) greater than 1 metric ton per year produced or imported.

Each importer is responsible for its own compliance with REACH.

The products mentioned above, in our opinion, fulfill the criteria of being classified as “articles”<sup>5</sup>. There are no substances intended to be released from these products under normal or reasonably foreseeable conditions of use<sup>6</sup>.

The above articles to our current knowledge do not contain substances, above the legal threshold, that are on the ‘Candidate List’ of Substances of Very High Concern (SVHC) as published on the ECHA website – latest on 07.07.2017.

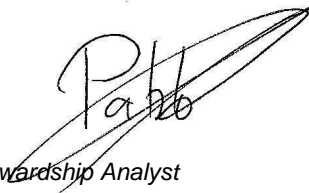

Under the above conditions, articles are exempt from pre-registration or registration under REACH.

To our current knowledge, all substances contained in the above articles are in compliance with the conditions of restrictions of REACH Annex XVII. DuPont will communicate in due course any changes due to future amendments of Annex XVII that may impact the manufacture, placing on the market or use of the substances contained.

To understand fully the obligations that you will have under REACH, we recommend that you consult the REACH web site at <http://echa.europa.eu>
